

# Drive Master 2006 Pro Technology Specifications

ULINK Technology, Inc.

## System Requirements

- Windows 2000, XP, or 2003 Operating System
- 256MB RAM or higher
- Motherboard with IDE Controller based on the Intel ICH5/6/7 chipset
- One PCI to ATA or PCI to SATA (Depends on the system drive) add-on card (Promise TX2 plus or equivalent)
- Minimum 16 MB video card. 64MB is recommended.
- At least 100MB hard drive free space
- Installation of Device Driver for HBA under test is recommended. For Intel or Universal AHCI HBAs, installation of device driver is required.

## Hardware Platform supported by Drive Master 2006 Pro

- **Intel**
  - ICH5
  - ICH6
  - ICH7
- **Marvell**
  - 88SX6081 SATA II
- **Silicon Image**
  - SiI3124 PCI-X
  - SiI3132 PCI-E
- **Universal AHCI-compliant HBAs, for examples:**
  - ATi
  - JMicron
  - SIS
  - ULi
  - VIA

## Recommendations

In order to run Drive Master 2006 Pro to its premium, here are some of our hardware recommendations:

- CPU – **Intel® Pentium® 4 Processor with Hyper-Threading Technology**
- HBA – **Intel ICH7 Chipset**
- Memory – **512MB DDR2 SDRAM**
- Motherboard – **Intel D955XBK (ICH7)**
- Test System – **Dell Precision 380**
- Video Card – **64MB nVidia Quadro PCI Express x16**
